                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 16, Application US/08475985

Patent No. 5972349

GENERAL INFORMATION:
APPLICANT: KANDIL, Ali
APPLICANT: KANDIL, Ali
APPLICANT: SIA, Charles
APPLICANT: SIA, Charles
TITLE OF INVENTION: Synthetic Haemophilus Influenzae
TITLE OF INVENTION: Conjugate Vaccine
TITLE OF SEQUENCES: 56
CORRESPONDENCES: 56
CORRESPONDENCES: ADDRESSE:
STREET: Suite 701, 330 University Avenue
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      29.5%; Score 31; DB 1; Length 14; 83.3%; Pred. No. 1.46+02; tive 1; Mismatches 0; Indels
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/475,989
FILING DATE: 07-JUN-1995
CLASSIFICATION DATA:
APPLICATION NUMBER: US 08/256,839
FILING DATE: 03-FEB-1993
CLASSIFICATION NUMBER: PCT/CA93/00041

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 4, Application US/08773008

Patent No. 5874401

GENERAL INFORMATION:
APPLICANT: SANOU Geamu
APPLICANT: HINO, Kateuhiko
TITLE OF INVENTION: PROTEIN, PROCESS TO PRODUCE THE SAME,
TITLE OF INVENTION: AND USES THEREOF
CORRESPONDENCES: 5
CORRESPONDENCES: 5
CORRESPONDENCES: BROWDY AND NEIMARK
STREET: 419 Seventh Street, N.W., Suite 300
CITY: Washington
STATE: USA
                              APPLICANT: Brauer, Ark A.;
APPLICANT: Exley, Mark A.;
APPLICANT: Exley, Mark A.;
APPLICANT: Dowers, Steven P.
TITLE OF INVENTION: Allergenic Proteins And Peptides From TITLE OF INVENTION: Japanese Cedar Pollen
NUMBER OF SEQUENCES: 261
CORRESSED INDEXESS:
ADDRESSEE: Immulogic Pharmaceutical Corporation, Inc.
STREET: 610 Lincoln St
CITY: Waltham
